

MAKING YOUR OWN PHOTO TRIBUTE

The photo presentation is a special way of showcasing the life of your loved one.
We want to guide you to ensure this memorable part of the service is perfect.

INFORMATION TO ASSIST YOU

We find the best programs to use are:

MAC: iMovie, VideoPod **WINDOWS:** Movie Maker, VideoPod, Storey Remix (Windows 10 only)

- As a rough guideline, photos should be on screen between 4-6 seconds.
- We find it best to keep it within 8 minutes, so usually no more than 80 photos (Quality over Quantity)
- The length of music chosen should be considered in relation to the amount of images. Please **embed your chosen music** into the photo tribute.
- Ensure you design it in a 16:9 widescreen ratio.
- Please remember to either save or export your presentation as a **.MOV** or **.MP4** format.

WHAT WE SUPPORT

Please provide your photo presentation with your chosen music embedded on a USB, or emailed via wettransfer.com as a **.MOV** or **.MP4** format.

WHAT WON'T WORK

Our system **does not support** Microsoft Powerpoint or Windows Media Video (**.wmv**) files

TEST IT ON OUR SYSTEM

Please bring your presentation to our offices **by 10am the day prior** to the service to ensure it is compatible in our system.

OUR FACILITIES

Our Wallsend chapel has 2 x 50" screens. Our Belmont chapel has projectors showing on 2 Large screens. Both have 50" screens at the entrance and in the foyer areas.

HERE TO HELP

Please contact our design team located at our Wallsend office, if you have any queries or issues and we will try our best to guide you through the process, on **02 4951 1166** or design@pettigrew.com.au

Please note, if your presentation does not work, we may be able to convert your presentation into a compatible format. A fee of \$50 may apply.

If you are finding it too stressful, we can produce a beautiful professional presentation for you. All information and photos are required by 10am the working day prior to the service. Please contact our design team or your Funeral Arranger.
