

Creating Keepsakes *Continued*

Allow us to assist you in creating a memorable photo presentation reflecting your loved ones life.

A photo presentation is a special way of showcasing the life of your loved one. Our Wallsend Chapel has high definition LCD displays in the chapel and foyer, while our Belmont Chapel has large projection screens in the chapel and high definition LCD screens in the foyer.

We digitise, colour correct and restore your family photos to create a fitting tribute. The Life Tribute photo presentation is saved to a leather bound USB and is a beautiful keepsake.

A base photo presentation package of up to 50 photographs is \$260

Additional photos will be charged at \$3 each | A maximum of 80 photos will be accepted

Selecting Your Photos

Once you have selected your 50 photos (or extra if you so choose) these will need to be placed in a folder labeled with your loved ones first and last name eg: "SMITH, John."

Your photos will be placed in a random order unless you have renamed each individual file.

Due to new restrictions all photos must be sent via email or wetransfer.com

***Tip:** If you are struggling to stay within the 50-80 photo limit here are a few things to consider:

- Make sure your loved one is in every photo.
- If you are trying to include all extended family, consider choosing group shots.
- Consider including more photos in the service booklet.

Selecting Your Music

Please consider the average length of a **50 photo presentation is around 5 minutes.** Select 2 songs, however the second song may only be used if required. All music is to be purchasable via iTunes. We are unable to use music from youtube due to licensing restrictions. (AMCOS Aria Licensed Copy, No. 31962)

You may put in an email or inform our team over the phone which piece of music you have selected.

How To Send Everything Through

Once you have made your selections and placed your chosen images in a folder we ask that you send it through to us via wetransfer.com This is a free transferring site which allows large files to be sent together in one transfer. This way we can insure all your selected images are included.

We are unable to ensure that all photos are included when multiple emails are sent through.

Our team are happy to assist with sending your files via wetransfer.com over the phone. Don't hesitate to call.

Our team is here to help if you have any further questions at this stage.
